Hi [First Name],

I noticed your Etsy shop sells printable wall art — which is awesome! One challenge many sellers face is the amount of time it takes to prepare all the different print sizes (8x10, 11x14, A4, 24x36, etc.) for each design.

Instead of exporting each size one by one, I build **custom Photoshop scripts** that do it all automatically:

- Take your original design
- Generate all standard Etsy sizes (2:3, 3:4, 4:5, A-series, square)
- Export them as **high-resolution PDFs** ready for your customers

What normally takes hours can be done in just a couple of clicks.

Would you like me to show you a quick demo of how this works?

Best regards, [Your Name] [Your Website / Portfolio Link]

🔑 Notes for You

- Keep it **short, benefit-driven, and Etsy-specific**.
 - Mention **time saved** and **PDF-ready exports** (their pain point).
 - Link your **portfolio landing page** so they can see proof (case studies / demos).
 - Always end with a **low-barrier CTA** ("Want to see a demo?" instead of "Hire me now").
-

👉 Do you want me to also write a **LinkedIn DM / Instagram DM version** of this pitch (shorter, more casual), since many Etsy sellers may be easier to reach on social instead of email?
