

Great question 🙌 — this is **right in the sweet spot** where your Photoshop + coding skills can shine, because Etsy sellers who deal in **printable wall art, posters, and digital downloads** often need to generate *many sizes from one design*.

Here's the breakdown:

Common Print Sizes Etsy Sellers Offer

Etsy sellers usually provide a **bundle of multiple aspect ratios** so buyers anywhere in the world can print at home, at a local shop, or via an online print service.

Popular Ratios & Sizes

1. **2:3 Ratio** (good for posters/photos)

- 4x6 in
- 8x12 in
- 12x18 in
- 16x24 in
- 20x30 in
- 24x36 in

2. **3:4 Ratio** (classic frame sizes)

- 6x8 in
- 9x12 in
- 12x16 in
- 15x20 in
- 18x24 in

3. **4:5 Ratio** (very common for frames)

- 8x10 in
- 11x14 in
- 16x20 in

4. **International Paper Sizes (A Series)**

- A5 (14.8 × 21 cm)
- A4 (21 × 29.7 cm)
- A3 (29.7 × 42 cm)
- A2 (42 × 59.4 cm)
- A1 (59.4 × 84.1 cm)

5. **Square Prints**

- 5x5 in
- 10x10 in
- 20x20 in

Why Sellers Deliver as PDFs

Etsy sellers usually sell **digital files in PDF format** for these reasons:

1. Preserves Quality

- PDFs can store **vector-based or high-res raster images** without compression issues like JPG.
- Keeps artwork crisp for printing at *any* size offered.

2. Print-Shop Friendly

- Print shops often prefer PDFs — easier to scale, ensures correct dimensions, no color profile mess-ups.

3. Multi-Page Convenience

- One PDF can contain multiple sizes (page 1 = 8x10, page 2 = 11x14, etc.).
- Buyers don't have to download 10 separate files.

4. Cross-Platform Compatibility

- Works on Windows, Mac, mobile, and with any standard printer software.

5. Professional Perception

- Feels more "polished" and "print-ready" compared to just handing over JPGs or PNGs.

Where You Come In

- Sellers often **manually export** 10+ sizes from their design → time-consuming.
- You can write a **Photoshop script** that:
 - Takes a single design
 - Auto-generates all aspect ratios
 - Exports them as **high-res PDFs in one click**
- That's a **killer pain-solver** for Etsy shop owners.

👉 Do you want me to draft you a **ready-to-send cold email to Etsy sellers**, where you pitch this exact pain point (time wasted on making multiple sizes) and offer your automation solution?
